## PROJECTS

- Lekha-Likhi blog website built with MERN stack

April 2021

A blogging website, made using Node.js, React.js, Express.js, MongoDB & Redux.js, where the admin can log in to create and delete blogs. It has an authentication & authorisation system, where the users can sign up/sign in to see and like or unlike the blogs. It is hosted on Heroku. Please check the admin functionalities to get a better understanding of the project. Email: sanketcjr@gmail.com, Password: jkrowling

- Weather App built with React-Hooks and external weather API

August 2021

This is my mini project(or 2nd project). It's a website that shows the weather of any place that the user enters in either Fahrenheit or Celsius. Along with temperature, it also shows a lot of other details.
